

AMENDMENTS TO THE CLAIMS

1. (Currently amended) A method comprising:
 - determining a problem from a context, wherein the problem comprises a status of a job in a computer system;
 - finding an on-demand task associated with the problem, wherein the on-demand task addresses the problem; and
 - presenting a notification of the availability of the on-demand task.
2. (Original) The method of claim 1, further comprising:
 - passing the context to the on-demand task.
3. (Original) The method of claim 1, wherein the presenting the notification further comprises:
 - displaying an icon indicating that the on-demand task is available.
4. (Original) The method of claim 1, further comprising:
 - determining whether a use of the on-demand task is available.
5. (Currently amended) An apparatus comprising:
 - means for determining a problem from a context, wherein the problem comprises a status of a job in a computer system;
 - means for finding an on-demand task associated with the problem wherein the on-demand task addresses the problem; and
 - means for displaying an icon indicating that the on-demand task is available.
6. (Original) The apparatus of claim 5, further comprising:
 - means for passing the context to the on-demand task in response to a selection of the icon.

7. (Canceled)

8. (Canceled)

9. (Currently amended) A ~~storage~~signal-bearing medium encoded with instructions, wherein the instructions when executed comprise:

determining a problem from a context, wherein the problem comprises a status of a job in a computer system;

finding an on-demand task associated with the problem, wherein the on-demand task addresses the problem;

displaying an icon indicating that the on-demand task is available; and

passing the context to the on-demand task in response to a selection of the icon.

10. (Currently amended) The ~~storage~~signal-bearing medium of claim 9, further comprising:

determining whether a user is authorized to use the on-demand task.

11. (Currently amended) The ~~storage~~signal-bearing medium of claim 9, further comprising:

determining whether a user is authorized to purchase a use of the on-demand task.

12. (Currently amended) The ~~storage~~signal-bearing medium of claim 9, further comprising:

processing a purchase of a use of the on-demand task.

13. (Currently amended) A computer system comprising:

a processor; and

memory encoded with instructions, wherein the instructions when executed on the processor comprise:

determining a problem from a context, wherein the problem comprises a status of a job in the computer system,

finding an on-demand task associated with the problem, wherein the on-demand task addresses the problem,

displaying an icon indicating that the on-demand task is available,

passing the context to the on-demand task in response to a selection of the icon, and

determining whether a use of the on-demand task is available.

14. (Original) The computer system of claim 13, wherein the instructions further comprise:

processing a purchase of the use of the on-demand task.

15. (Canceled)

16. (Canceled)

17. (Currently amended) A method of configuring a computer to perform the method comprising:

configuring the computer to determine a problem from a context, wherein the problem comprises a status of a job in the computer;

configuring the computer to find an on-demand task associated with the problem, wherein the on-demand task addresses the problem; and

configuring the computer to present a notification of the availability of the on-demand task.

18. (Original) The method of claim 17, further comprising:

configuring the computer to pass the context to the on-demand task.

19. (Original) The method of claim 17, wherein the configuring the computer to present the notification further comprises:

configuring the computer to display an icon indicating that the on-demand task is available.

20. (Original) The method of claim 17, further comprising:

configuring the computer to determine whether a use of the on-demand task is available.
